

First time fishy stories

A GROUP of primary school children got a close of view of Durban's marine life.

The 35 prefects from Nhlonipho School had their first visit to Sea World at uShaka Marine World. As part of their practical studies, Tour and Tour Operations students at Varsity College, Durban North campus researched, planned and implemented the tour for the pupils.

The students priced the most appropriate tours, booked the most suitable and, through their fundraising efforts, were able to cover the cost of the tour for each prefect and three of their teachers.

They were also able to raise enough money to treat the group to lunch. The pupils learned about water purifying techniques, animal rehabilitation and toured the aquarium. Then they got to watch a dolphin show where three of the pupils were chosen for an up-close experience with the dolphins.
